The rules of the deck

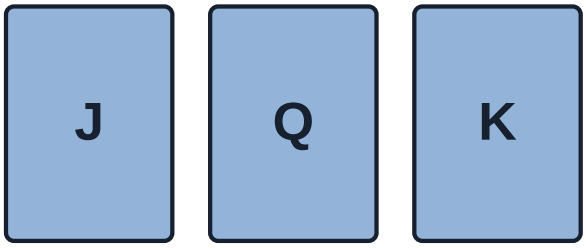
Year 6 Statistics and Probability · Lesson 3

Reference

Every card in your deck is either a picture card or a numbered card. Nothing is both.

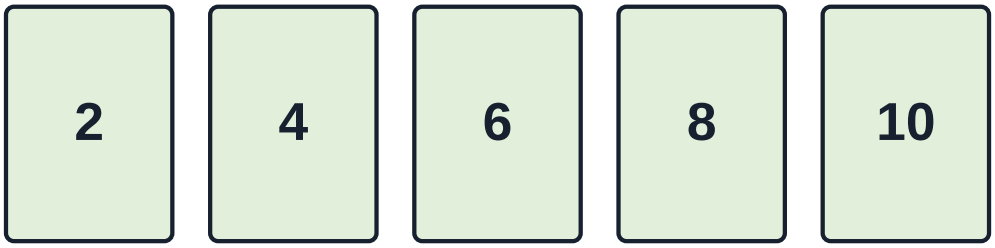
PICTURE CARDS

These have no number.



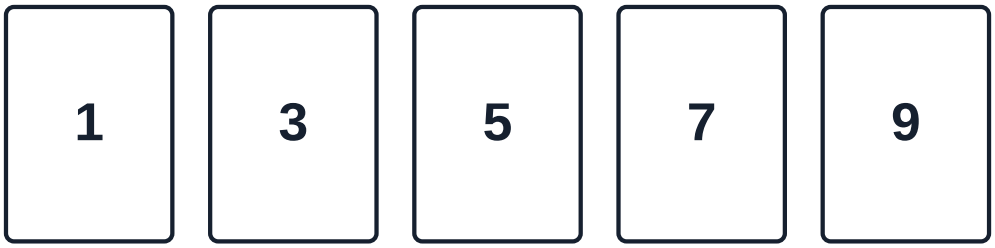
EVEN NUMBERS

A number you can share equally between two.



ODD NUMBERS

The numbers that are left over.



BEFORE YOU START

Cards can repeat. You are allowed three 4s in the same deck if you want them.
When you test your deck, put the card back every time before you draw again.
If you do not put it back, the probability changes after every draw.
