Name		Team	

The four types

Type	What it means	An example from Games Day
Nominal	Groups, no order	Which outcome they got
Ordinal	Groups, in an order	How much they liked it
Discrete	Counted, whole steps	Turns won out of three
Continuous	Measured, anything between	Seconds the visit took

The test that separates the last two: does half of one make sense? Half a win does not. Half a second does.

Part A · Naming the type

SF 1

Draw a line from each one to its type. Use the table above.

What we would record	Its type
The colour of the counter they drew	
How many of three turns they won	
Seconds the visit took	
How much they liked it, from 1 to 4	

SF 2

Which one of those four needs a stopwatch? Which one needs nothing but your eyes?

Part B · Questions that data can answer

CF 3

"Was our game fun?" cannot be answered with data. Rewrite it as a question that can be. Then say what you would have to collect to answer it.

MY REWRITTEN QUESTION

WHAT I WOULD HAVE TO COLLECT

Sentence starter: How much did _____ enjoy _____? To answer it I would collect _____ from _____ buddies.

CF 4

A team decides to record enjoyment as just "good" or "bad". Compared with a four-point scale, name one thing their data will not be able to show.

Sentence starter: With only good and bad, they could not tell the difference between _____ and _____.

Part C · Planning for the day

CF 5

Name one thing that will be hard to record while a five-year-old is standing in front of you. What will your team do about it?

CU 6

Your team has three people and about twelve buddies will visit. Give each person a job so that every row gets filled in. Say what happens first, second and third for one buddy.

Sentence starter: _____ runs the game. _____ holds the stopwatch. _____ writes. First _____, then _____, then _____.

CU 7

Your sheet has one spare column. What is the one extra thing worth recording, and which of the four types is it? Say why it is worth a column.

Designing your sheet

Write a heading for each column, in the order you would fill them in on the day. Then write one example row as if a buddy had just played.

Buddy	Outcome	Turns won	Seconds	Liked it	Spare
Ava	Gold	1	38	4	

Your first row is filled in for you. Ava got gold on her first turn, won one of her three turns, took 38 seconds, and gave it a 4. Copy that shape for the rest.

Our team’s jobs on the day

Who	What they do	When

Test it before you finish

Hand your sheet to another team and ask them to fill in one row without you explaining anything. If they cannot, your headings are not clear enough yet.

The team who tested our sheet	

WHAT THEY COULD NOT WORK OUT, AND WHAT WE CHANGED

Exit ticket

On your own. Five minutes. Do not talk to your team for this part.

SF 1

Name the type of each one: the colour of a buddy's sticker; the number of stickers left in the jar; how many minutes the queue was.

CF 2

Your team wrote all its times down at the end of the session instead of after each buddy. Name one way the data could be wrong because of that.

Sentence starter: The times might be wrong because _____.

CU 3

You can only record three of the four things on the day. Which one would you drop, and what would you no longer be able to say about your game?
