Name		Team	

Team Comet's counts

Fifteen buddies played Treasure Bag. Two of them left before they could be timed or asked, so some counts add to fewer than 15. That is correct.

Outcome	Buddies	Rating	Buddies	Won / 3	Buddies
Gold	6	1	0	0	4
Silver	4	2	2	1	5
Blue	5	3	6	2	4
		4	5	3	1

Shortest visit	Longest visit	Times we have	Buddies altogether
33 seconds	44 seconds	13	15

Part A · Mode, range, shape

One row per distribution. Range only works for numbers — if a column has no range, write why.

Distribution	Mode	Range	One sentence about its shape
Outcome of first turn			
Liked it (1–4)			
Won out of 3			

A shape sentence has to be about buddies, not bars. Test it: could somebody who has never seen the graph understand your sentence?

SF 3

For "outcome of the first turn" — Gold, Silver or Blue — would you use a column graph or a line graph? Why?

CF 6

A student writes "the blue bar is shorter than the gold bar". Why is that not a description of the data? Rewrite it so it is.

Part B · What the numbers hide

CU 7

Comet has 15 buddies but only 13 times. Suppose the two missing times had been 20 seconds and 90 seconds.

	Before	If the two missing times were 20 and 90
Range	11 seconds	
Mode	40 seconds	

WHICH ONE IS MORE FRAGILE, AND WHY?

CU 8

Your display has to answer one question for somebody who was not at Games Day. Write that question, then say what your display shows about it.

MY QUESTION

WHAT MY DISPLAY SHOWS ABOUT IT

Our own display

Pick one column from your team's cleaned file: outcome, rating, or wins. Not the visit times — those need grouping first, which is Lesson 13.

The column we chose	

Its type	

Our frequency table

Value	How many buddies

A sketch of our display

Rough is fine. The real one is on the screen. Give it a title and label both axes.

Three sentences about it

THE MODE

THE RANGE, OR WHY THERE IS NOT ONE

THE SHAPE

Exit ticket

On your own. Five minutes. Nine buddies rated a game: 4, 3, 4, 2, 4, 3, 1, 4, 3.

SF 1 What is the mode? What is the range?

CF 2 Write one sentence describing the shape of those nine ratings. It must be about buddies, not bars.

CU 3 Someone reports only "the mode was 4". Name one thing about those nine ratings that this hides.
