Step-by-step strips

Cut along the lines · one strip per student

Pre-filled strips for the three lessons with the most steps, then blanks. Tick each step as you finish it.

LESSON 5 · Simulation at scale

- [ ] 1. Choose your chance device
- [ ] 2. Check the sample space is right
- [ ] 3. Predict how many times for 20 trials
- [ ] 4. Lock in the prediction
- [ ] 5. Run 20 trials — write the results down
- [ ] 6. Run 200, then 2000
- [ ] 7. Answer: when did the results stop jumping?

LESSON 10 · Cleaning our data

- [ ] 1. Open the team workbook
- [ ] 2. Check every column has a heading
- [ ] 3. Mark any blanks as "missing" — do not invent
- [ ] 4. Fix spellings so categories match
- [ ] 5. Flag anything impossible
- [ ] 6. Label each column with its data type
- [ ] 7. Build a frequency table

LESSON 13 · Grouping continuous data

- [ ] 1. Find the smallest and largest value
- [ ] 2. Choose your interval width
- [ ] 3. Write the interval boundaries
- [ ] 4. Tally each value into an interval
- [ ] 5. Build the display
- [ ] 6. Describe the shape
- [ ] 7. Rebuild with a different width and compare

BLANK STRIP

LESSON _____

- [ ] 1. _____
- [ ] 2. _____
- [ ] 3. _____
- [ ] 4. _____
- [ ] 5. _____
- [ ] 6. _____
- [ ] 7. _____
